

LED Work Lights - Polar Series

Grizzly POLAR is a compact and yet, powerful LED worklight (1,050 Lumens). It is thin in configuration for easy storage (ideal for emergency kit). Rated at IP65, it is highly water resistant (if you are looking at dipping the worklight in the water, then, you should be looking at IP68).

It comprises of 4,400mAH Lithium Ion high performance battery which gives you ample juice to charge your smartphone and other equipment that's accessible to a USB charger. Grizzly POLAR has an "in" and "out" charger, meaning that you can also use your USB friendly equipment to charge the worklight too, even though you will be provided with a plug in charger anyway. Grizzly POLAR's light can be used at full capacity and 50% capacity, which gives you a longer battery life.

Grizzly POLAR also has some extra amazing features, for example, if you happen to be changing your tyre on the side of the road, there is an option to change it to flash mode so that you can be seen in darkness. Or, if you find yourself trapped in a compromising situation, fear no more as it also has a SOS function to seek help. Grizzly POLAR's stand is magnetic and it is ideal for engineers that work on steel surfaces. Grizzly POLAR is compact but it carries a punch. It might be your best investment yet! TECHNICAL DATA SHEET

SPECIFICATION		
Model No	WLCL10W-POL	
Image		
Wattage (W)	10	
IP Rating	65	
Charging Time	4-5 hours/battery	
Discharging Time	8 hours	
Lumens (brightness)	1,050	
Battery	1 x Lithium Ion 3.7V - 4400mAh	
Dimming (brightness)	1 click 100% 2 clicks 50%	
Safety Features	Charging, Discharging & High Temp Protection	
Lifespan	>30,000 hours	
Charger	100-240V input, 12 V, 1A output adaptor & Car Charger	
Weight	445g	

COB* stands for Chip-On-Board.

CCT* stands for Colour Temperature (measured in Kelvin).
